EtherCAT Product Guide Entry Rules @ www.ethercat.org

The following rules apply to entries in the EtherCAT Product Guide on the website of the EtherCAT Technology Group (ETG).

1. The EtherCAT Product Guide https://www.ethercat.org/products contains EtherCAT products and products for the use in EtherCAT networks. It also lists EtherCAT development environments, tools, and services. The ETG reserves the right to reject entries that do not correspond to the prerequisites mentioned.

2. ETG member companies are entitled to make entries. If the number of entries per member exceeds an acceptable limit, several products may be combined in one entry. The ETG reserves the right to limit the number of product entries depending on the content. ETG members who exhibit at ETG exhibition booths will be given preferential treatment.

3. Entries in the EtherCAT Product Guide are free of charge.

4. Product entries can be revoked at any time.

5. ETG will make entries and changes promptly. Nevertheless, no fixed processing times can be guaranteed.

6. The ETG exclusively promotes EtherCAT. Mention of other Fieldbus or Industrial Ethernet systems is limited to entries of gateways. If a device supports other systems, this can be mentioned in general terms (e.g.: "besides EtherCAT, other Fieldbus systems are supported").

7. The ETG provides forms (DOC and PDF) for a product entry: https://www.ethercat.org/en/downloads/downloads_A1FA711A33E949C4B68A352F54968DE4.htm

8. The primary language for the Product Guide is English, but entries in German, Chinese, or Japanese are also possible. Language-dependent forms are available. The ETG recommends using the forms provided. If the use of a form is not possible, please provide the information informally and without special formatting by email: Product type (main category, sub-category), product name, short product text (max. 200 characters including spaces), long product text (max. 2,000 characters incl. spaces), keywords (for Internet searches, max. 10).

9. Product images are inserted with 200x151 pixels (width x height). Images with a resolution of at least 150 dpi in common graphic formats are accepted in all sizes and can be reformatted accordingly.

10. It is possible to add URLs to a product entry, e.g., to a datasheet or a corresponding product area on the company website.

11. Texts, photos, and graphics of the ETG member companies must be approved, including copyright. Members guarantee the worldwide, non-exclusive, non-transferable, irrevocable right to free and unlimited use of the material provided. This right specifically includes the right to publish the content on https://www.ethercat.org, as well as in newsletters, print media, and other publications of the ETG.

12. The ETG and its representatives assume no responsibility for the content, correctness, completeness, or quality of the material made available. Liability claims for damage resulting from the use of the information made available by the ETG member companies do not apply. The liability lies solely with the member company.

13. Please send your completed entry forms to info@ethercat.org.
